

SMG Indium Resources Ltd. Completes \$5.8 Million Financing

Newtown, Pennsylvania, January 12, 2010 -- SMG Indium Resources Ltd. ("SMGI") today announced that it has closed a private placement (the "Offering") of investment units consisting of class A common shares and five-year warrants (the "Warrants") for total gross proceeds of \$5,818,000.

Rodman & Renshaw, LLC ("Rodman"), a subsidiary of Rodman & Renshaw Capital Group, Inc. (Nasdaq: RODM) acted as placement agent for the Offering.

SMG Indium Resources expects to use the net proceeds from the Offering to purchase and stockpile already processed and mined indium ingots and for general corporate and working capital purposes. The purpose of our Company is to permit a simple and efficient mechanism by which an investor may benefit from the appreciation in the price of indium. To our knowledge, this is currently the only investment that allows investors to directly participate in the price appreciation of indium other than physical delivery of the metal itself. Our indium will be insured and physically stored in third-party facilities. Our shareholders will have the ability to invest in a company whose value will be tied to its interest in indium in a manner that does not directly include the risks associated with ownership of companies that explore for, mine and process indium.

Mr. Alan Benjamin, Chief Executive Officer of SMG Indium Resources Ltd., stated, "We are pleased to complete our first external fundraising in the U.S. capital markets and would like to thank our new shareholders for their commitment to our Company. These funds will be utilized to purchase and stockpile the metal indium. Indium is a minor metal with unique properties that make it vitally important to many newly emergent technologies. Indium in the form of indium-tin-oxide is a transparent conductive oxide. It is both electrically conductive and, when applied in a thin film, also optically transparent. Indium is a critical metal used in the manufacturing of liquid crystal displays ("LCDs"), light emitting diodes ("LEDs"), and the next generation thin-film photovoltaics known as "CIGS" or Copper-Indium-Gallium-diSelenide solar cells. Our plans include filing for an initial public offering "IPO" on a major U.S. exchange during 2010."

About SMG Indium Resources Ltd.

SMG Indium Resources Ltd. purchases and stockpiles the metal indium. Our strategy is to achieve long-term appreciation in the value of our indium stockpile, and not to actively speculate with regard to short-term fluctuations in indium prices. Our indium will be insured and physically stored in third-party facilities. While it is not our current intention to do so in the short term, at our discretion, we may subsequently lend, or sell, some, or all, of our indium stockpile based on market conditions. Our shareholders will have the ability to effectively purchase an interest in indium in a manner that does not directly include the risks associated with ownership of companies that explore for, mine and process indium.
